

IMPACT Software Suite

PPT VISION

A single software platform that supports the entire family of **IMPACT** Intelligent Cameras

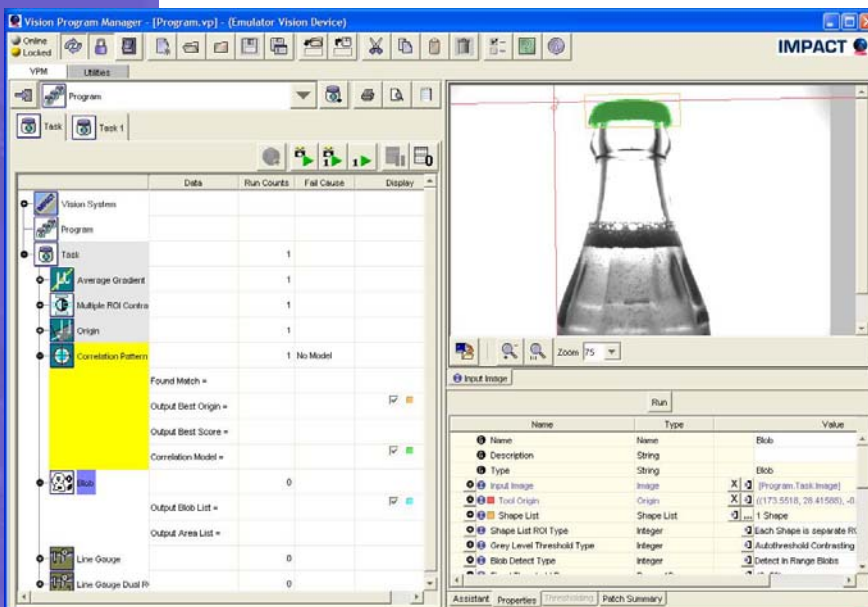

IMPACT KickStart

- Deploy a complete inspection application in minutes
- Optimize camera shutter setting and adjust external illumination intensity
- Pre-configured setup panels with image display aids inspection setup
- Powerful inspection tools accommodates various types of applications
- Integrated trigger buttons makes program testing fast and easy
- Runtime panel shows image and inspection results with clear production yields

Quickly deploy inspection solutions with KickStart

IMPACT Vision Program Manager (VPM)

- Powerful, flexible, and easy to use
- Visual programming with built-in, detailed tool setup instructions
- Image display with zoom control
- Over 80 tools available, including Morphology, Pattern Find, Gauging, OCR, Data Matrix, Image Stitching and more
- Integrated trigger buttons makes program testing fast and easy
- Visual tool status and inspection data are available on the same screen
- Built-in Utilities software provides camera setting adjustments, file management and vision device diagnostics

Create advanced applications fast with VPM

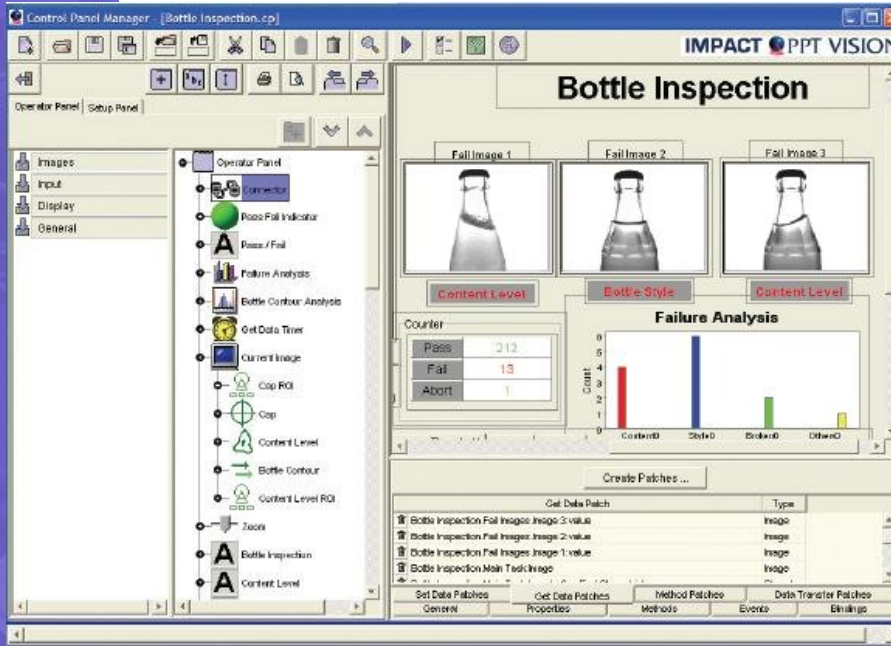

IMPACT Software Suite

PPT VISION

IMPACT Control Panel Manager (CPM)

CPM Edit-mode View

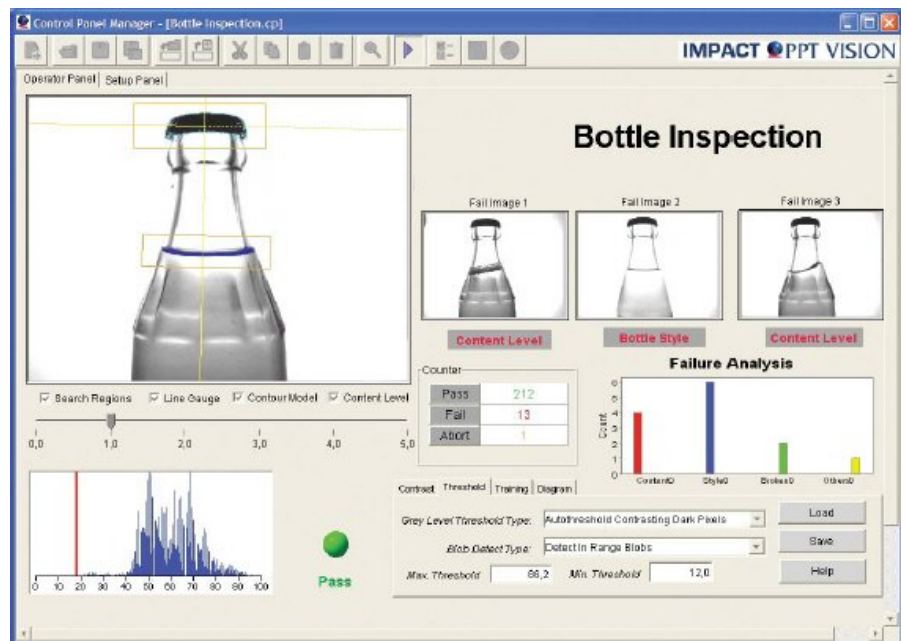

- Powerful, flexible, and easy to use
- Allows for simple to advanced HMI interfacing to suit specific applications
- Visual programming with built-in, detailed setup instructions
- Installation includes sample templates files
- Over 50 controls available, including Image Display with ROI Overlay, Chart, Table, Tab, Checkbox, Indicator Light and more
- Multiple cameras displayed and controlled on the same panel

Develop a custom HMI interface fast with CPM

CPM Runtime View

- Multiple Control Panel scheme allows for effective data organization
- Sensitive settings and information can be Password protected on separate Panel
- TCP/IP and Scriptor controls allow for communications with 3rd party software
- Operates under both Windows and Linux OS
- Embedded CPM option operates within an ActiveX environment

Advanced and powerful interfacing for real-time operations
